SUMMARY

Results-driven Data Scientist with 2+ years of experience building and deploying end-to-end ML solutions across the full lifecycle — from data engineering and modeling to deployment and monitoring. Proficient in Python, SQL, and cloud platforms with a strong focus on Generative AI, including LLMs, RAG architectures, and fine-tuning techniques. Passionate about translating complex models into actionable business impact at scale.

PROFESSIONAL EXPERIENCE

Data Scientist:

04/2023 – Present

Virtusa (Deployed at Google)

Hyderabad, India

- **AI in Dashboard:** Built an LLM-powered NL query interface using SVM-based intent classification to translate plain-English questions into validated SQL, with schema-aware reasoning and interactive visualizations for non-technical stakeholders.
- **BugSuggestion:** Developed a duplicate bug detection system across 20+ products using Google's text-embedding-005 (768-dim) and GCP Vector Search. KNN similarity search surfaces top-K duplicates at submission, automating triage and accelerating resolution.

KEY PROJECTS

AI-Powered Amazon-Style Product Listing Generator:

2025

- Built a multimodal IR system using OpenAI CLIP + FAISS to retrieve similar products from 50K+ records and auto-generate Amazon-style listings via the Claude API.
- Implemented hybrid BM25 + dense retrieval (Precision@10 +18%), enhanced visuals with Stable Diffusion/ControlNet, deployed via React + FastAPI; evaluated with MRR and Recall@K.

Custom Linux Shell:

2025

- Built a Unix-like shell in Go with a REPL engine, built-in commands (cd, pwd, echo, clear, exit), and external process spawning via os/exec with real-time stdout/stderr streaming.
- Handled edge cases (empty input, unknown commands, Ctrl+C) and validated cross-platform compatibility (Ubuntu 22.04 WSL2, macOS Ventura) via unit/integration tests and static analysis.

TECHNICAL SKILLS

Generative AI: LLMs, SLMs, Prompt Engineering, Fine-tuning (LoRA, QLoRA), RAG, LangChain, LangGraph, AI Agents, Multi-Agent Systems, LLMOps

Machine Learning: Regression, Classification, Clustering, Dimensionality Reduction, CNNs, RNNs, LSTMs, GANs, Transformers, Autoencoders, Computer Vision, Object Detection, Image Segmentation, OCR, NER, Sentiment Analysis, Text Classification, PyTorch, TensorFlow, Scikit-learn, HuggingFace, Ollama

Database & Cloud: MySQL, PostgreSQL, Redis, MongoDB, Firebase, Pinecone, ChromaDB, FAISS, Weaviate, GCP, Google DataNexus, AWS (S3, EC2, IAM)

DevOps & Tools: Docker, Kubernetes, Terraform, CI/CD Pipelines, RESTful APIs, Git

EDUCATION

B.Tech in Computer Science and Engineering:

2019 – 2023

Kalasalingam Academy of Research and Education **CGPA: 8.7**

CERTIFICATIONS & ACHIEVEMENTS

Research Publication

“Skin Cancer Classification using Convolution Neural Networks” – [View Paper](#)

Oracle Certified Java Associate, Oracle

2023

Received Time Award at Virtusa for outstanding contributions, innovation, and passion in Generative AI initiatives.

2025
